

Duke University

Laboratory Calculus, 2006 – 2007

prepared and edited by

Lewis Blake

Associate Professor of the Practice

Supervisor of First-year Instruction

Michael Reed

Professor of Mathematics

Chair, Calculus Committee

with the assistance of

Jack Bookman, Associate Professor of the Practice of Mathematics

Robert Bryant, J. M. Kreps Professor of Mathematics

Lester Coyle, Assistant Professor, Loyola College

Laura Taalman, Assistant Professor, James Madison University

James B. Tomberg, Lecturer

Kirsten Travers, Associate Director, Global Credit, Bear Sterns, NY

Edward Welsh, Assistant Professor, Westfield State College

This course pack is dedicated to Professors Lang Moore and David Smith. Their innovative ideas, their devotion to students, and their hard work over many years changed the way Calculus is taught in the United States.

Table of Contents – Math 31L

| | |
|---|----|
| Introduction | 1 |
| Lab: Risk Factors for Breast Cancer | 7 |
| Lab: Log Plots | 13 |
| Lab: Strategies for Buying Stocks | 21 |
| Lab: Introduction to Euler’s Method | 27 |
| Lab: Newton’s Law of Motion | 37 |
| Lab: Chemical Rate Equations | 47 |
| Lab: First & Second Derivatives and Roots | 51 |
| Lab: Riemann Sums | 57 |
| Lab: Net Worth of a Company | 65 |
| Differential Equations | 69 |
| Related Rates Homework | 79 |
| Calculator Drill | 81 |

Table of Contents – Math 32L

| | |
|---|-----|
| Introduction | 1 |
| Lab: Probability and Geometric Series | 87 |
| Lab: Integrating to Infinity | 93 |
| Lab: Normal Data Sets | 97 |
| Lab: Air Pollution: Particulate Matter | 103 |
| Lab: Present Value and Future Value | 109 |
| Lab: Varying Density | 115 |
| Lab: Series Solutions of Initial Value problems | 121 |
| Lab: Fourier Analysis of a Musical Sound | 127 |
| Lab: Limited Immunity in Epidemics | 135 |
| Lab: World Population | 141 |
| Lab: Oscillations in Physiology | 145 |
| Lab: Taylor Approximations | 149 |
| Probability #1: Outcomes and Events | 157 |
| Probability #2: Random Variables | 165 |
| Probability #3: Expectation and Options | 173 |
| Series #1: Limits of Partial Sums | 181 |
| Series #2: Tests for Convergence | 189 |
| Series #3: The Integral Test | 197 |
| Series #4: Alternating Series | 205 |
| Series Worksheet | 219 |
| Integration Practice | 225 |
